

## Product Sheet

# Dedicated Internet Access (DIA)

## Speeds up to 100 Gbps

### All Businesses Depend on the Internet.

Dedicated Internet Access is a private connection between your business and the web. Unlike typical shared broadband services, the fiber connection is dedicated to your business and don't compete with other subscribers usage. With symmetrical upload and download speeds, your upload speeds are as fast as your download speeds.

### Fiber Optic Internet

Fiber Optic Internet, is the transmission of data by light signals that travel on a fiber encased in a cable. Unlike copper telephone lines used for broadband internet, fiber optic cables can carry large bundles of information at one time. Fast speeds support business-critical application performance.

- High-capacity bandwidth handles streaming media and large upload/download transfer demands faster
- Symmetrical speeds provide dependable and consistent data throughput
- Enjoy faster speeds over much longer distances that DSL and Cable services can provide
- A great service option to power Business VoIP service: crystal-clear video and voice communications
- Dedicated internet access with guaranteed speeds
- Highest level of SLAs
- Symmetrical Fiber connectivity with speeds ranging from 3 Mbps to 100 Gbps
- Availability in nearly 5 million lit buildings

## Why Fusion Connect?

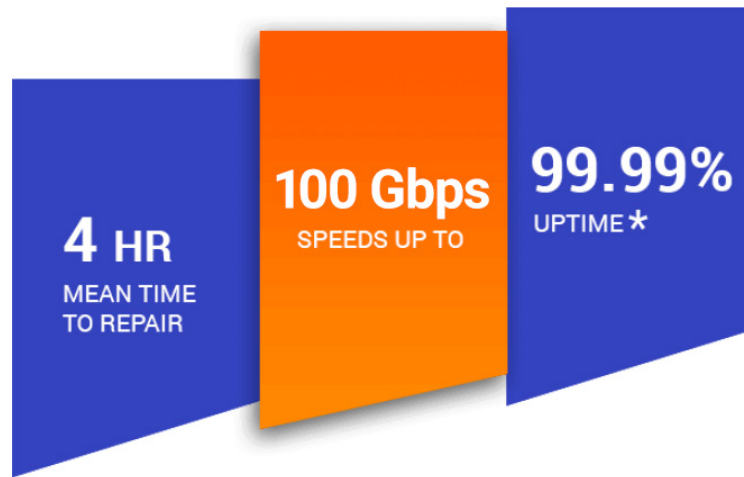

---

### Business Customization

Fusion Connect provides a complete set of Dedicated Internet Access (DIA) products for your business needs and internet speed requirements.

Flexible and scalable bandwidth, and industry-leading Service Level Agreements (SLAs).

If you need reliable and consistent bandwidth speeds, prioritized technical support, and guaranteed uptime, the investment in Fusion Connect dedicated internet access is more than worth it.

\*Depending on service type and addition of Failover services.
