Microsoft 365 for U.S. Government
Modernizing government security and productivity

Microsoft 365 brings together Office 365, Enterprise Mobility + Security (EMS), and Windows 10 to help government organizations protect citizens and their data; find meaningful insights from growing amounts of data; modernize legacy IT systems; enable departments across government to work better together by sharing information; and drive new efficiencies to resolve problems and respond to citizen needs faster than ever before.

Government solutions powered by Microsoft 365 help to...

Help protect citizens and their highly sensitive data

Implement a modern security strategy that embraces control-based compliance and identity-based security. Leverage risk-based security tools that help protect, detect, and respond to attacks against users, apps, or devices to ensure you can protect sensitive government, worker, and citizen data at every level.

Find meaningful insights to respond intelligently to citizens' needs

Analyze and share data in easily consumable visual formats so you can identify issues and opportunities to serve citizens better. Increase transparency by helping enable secure sharing of information with both internal and external stakeholders.

Modernize legacy IT systems to reduce administration and cost

Move away from aging apps and infrastructure by moving to a cloud platform that provides evergreen solutions to help you stay current with an environment that is always up to date. In addition, Microsoft's ability to quickly update its services helps ensure you are protected against the latest threats.

Work better together from anywhere, using familiar apps that drive inclusivity

Use familiar Office apps to work from anywhere using any device, collaborate better across departmental and agency boundaries, and create and consume accessible content to better connect with coworkers and citizens with disabilities.

Microsoft 365 for U.S. Government
Modernizing government security and productivity

Microsoft 365 for U.S. Government plans are designed for the unique needs of U.S. Government organizations. They provide all the features and capabilities of Office 365, EMS, and Windows 10 services in a segmented government cloud community that enables organizations to meet U.S. compliance and security standards.

Eligibility requirements

Office 365 U.S. Government plans are available to (1) qualified government entities, including U.S. federal, state, local, tribal, and territorial government entities, and (2) other entities (subject to validation of eligibility) who handle data subject to government regulations and requirements, where use of Office 365 U.S. Government is appropriate to meet these regulations and requirements. Each plan is offered as a monthly subscription and can be licensed to an unlimited number of users.

A government organization is typically (a) any government agency, department office, division, unit, or other entity of state or local government or (b) any county, borough, commonwealth, city, municipality, town, township, special purpose district, or similar type of government instrumentality established by laws of customer's state and located in the customer's state jurisdiction and geographic boundaries or (c) any other entity in the customer's state expressly authorized by the laws of the customer's state to purchase under state contracts.

Evaluation and proof of concept of Microsoft 365 for U.S. Government

Let our digital workplace architects who specialize on the latest generation of Microsoft collaboration products help guide you in your digital transformation. We offer customers an overview of Microsoft Office 365, EMS, and Windows 10 to demonstrate the vast capabilities these products offer your organization. As part of this overview engagement, we will help evaluate your organization and provide suggestions of how these new collaboration capabilities will bring your employees together. We will provide stories of how other customers in industries like yours have transformed and increased their capabilities to communicate. This two-hour engagement is just the start.
