# fusion connect℠

Technology Solutions for Senior Living Communities

**Serve Your Residents More Effectively and Securely.
Future-Proof Your Operations.**

Support the mental and emotional wellbeing of your residents by providing reliable phone service and WiFi network access while also supporting the security and operational needs of your facilities. Fusion Connect helps senior living communities address today's technology and security challenges, so you can focus on the health, safety, and well-being of your residents
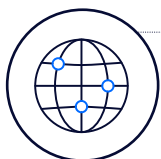

Reliable Phone Systems and Unified Communications

Empower your doctors, technicians, and staff to stay connected and collaborate instantly among themselves via secure chat, text, screen sharing, and audio and video conferencing—regardless of their location. Enhance resident satisfaction by providing bedside phone service they can count on.

High-Speed Internet

Connect your support services, care level facilities, administrative offices, and remote care providers through business-class broadband services. Effortlessly support speed-hungry applications such as high-resolution videoconferencing and data replication and backup. And ensure your cloud-based applications are continuously accessible through a network connection that is always on, guaranteed.

Secure Networking

Let our network security experts take the guesswork, risk, and hassle out of deploying a network that supports your mission-critical network traffic and maintains patient data security.

Managed WiFi

Effectively support wireless medical devices and wireless-enabled sensing devices to empower your staff to more efficiently and securely connect to the data and records needed to provide optimal resident care. Serve your residents and guests by supporting their device connectivity needs throughout your facilities.

The Fusion Connect Advantage

Connect.

Connecting anytime, anywhere, from any device is imperative for your business to operate at peak efficiency. To enable this, we deliver a comprehensive set of communication tools all powered by our nationwide IP backbone.

Protect.

Security that creates too much friction slows you down, so Fusion Connect developed a frictionless, zero-trust security approach that protects end-users and infrastructure, including end-devices, data center, and cloud resources.

Accelerate.

Speed matters in business. To enable you to move dynamically, we deliver a technology stack designed to provide real-time visibility into your business performance, backed by the industry's most comprehensive service guarantee.
